# SOURCE COARSE™

## CAUTION

Please test product compatibilities in small amounts before use or putting into equipment.

## Warning!

Please be advised of possible adverse reaction to Source Coarse mixed with and NPK blends utilizing ammonium sulphate and or urea. Ammonia gas generated from a small amount of moisture from urea (prilled or Chrystalline) may cause a reaction with Source Coarse causing it to cake or solidify preventing satisfactory dry spreading of fertilizer and amendment.

Leonardite can be blended satisfactorily with many NPK and straight fertilizers yet reaction with moisture in the form of ammonia gas may occur.
